

US Short Term Bond

Seizing the full spectrum of yield opportunities in short term bonds December 2024

Trust must be earned

Important Information

- 1 The fund invests mainly in U.S. dollar denominated short-term bonds and in comparable securities that are denominated in other currencies, provided that the currency exposure is principally hedged back to the U.S. dollar.
- 2 Investing in this fund may expose investors to exchange/currency risk and European sovereign-debt crisis risk. It may also involve risks associated with debt securities and risk of investment in ABS/MBS.
- 3 The fund may use financial derivative instruments (FDI) for hedging, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities. FDI exposure may involve additional risks such as credit/counterparty risk, volatility and liquidity risk, valuation risk and over-the-counter transaction risk. The fund may be leveraged and suffer losses from its FDI usage.
- 4 RMB is currently not freely convertible and is subject to exchange controls and restrictions. Under exceptional circumstances, payment of redemptions and/or dividend payment in RMB may be delayed due to the exchange controls and restrictions applicable to RMB.
- 5 For hedged classes, there is no guarantee that the hedging techniques employed by the manager will fully and effectively achieve the desired result and effect. Furthermore the volatility of the hedged classes may be higher than that of the equivalent class denominated in the fund's base currency. If the counterparties of the instruments used for hedging purpose default, investors of the hedged classes may be exposed to currency exchange risk of the currency of denomination of the relevant class on an unhedged basis and may therefore suffer further losses.
- 6 For distribution class, the fund may at its discretion determine to pay dividends out of income or capital or effectively out of capital of the fund. Payment of dividends out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any distributions involving payment of dividends out of the fund's capital or payment of dividends effectively out of the fund's capital (as the case may be) may result in an immediate reduction of the net asset value per share of the fund.
- 7 The value of the fund can be volatile and could go down substantially. Investors may suffer losses.
- 8 Investors should not only base on this marketing material alone to make investment decisions.

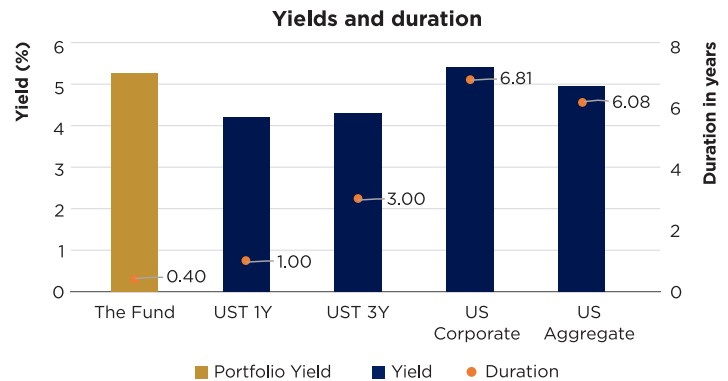

Why Amundi Funds US Short Term Bond now?

1 Seize yield opportunities from short-term bonds

The Fund currently yields at 5.21% (as of 31 December 2024), which compares favorably to short-dated US Treasuries at 4.16% (US Treasury 1 year yield as of 31 December 2024).

Short term bonds are currently providing similar yields to longer-dated bonds. Investors can enjoy the potential income streams with less duration risks (sensitivity of the bond's price to the change in interest rates).

Indices used: UST 1Y and UST 3Y - US Fed Rates as of 31 December 2024. US Corporates - Bloomberg US Corporate Investment Grade, US Aggregate - Bloomberg US Aggregate Index. Past performance is no guarantee of future results.

2 Keep volatility in check regardless of the direction of interest rates

The Fund primarily invests in short-term bonds with an average duration of 0.40 years[^], reducing its sensitivity to interest rate fluctuations while providing a defensive position to navigate market volatility.
